

Bang a Baby Boomerang

Print this page onto a light white board and cut out the individual Baby Boomerangs.

Using a gum, paste or craft glue join two together back to back so that the design shows. This will add weight and stability to your boomerangs.

When you have done this you can place one on the palm of your hand with about a third of the boomerang sticking over the edge. Give the boomerang a quick flick with your finger and it should do all of the things that the big ones do.
